

West Valley City Station Area Plans

Help us create a vision for areas around West Valley City light rail stations

West Valley City is developing Station Area Plans to guide future improvements within one-half mile (10-minute walk) of the existing TRAX Green Line stations at: Decker Lake, Redwood Junction, and River Trail.

The Station Area Plans will serve as blueprints to guide future improvements. Major topics to be explored include:

- **Housing:** increase the availability and affordability of housing
- **Sustainability:** promote sustainable environmental conditions
- **Livable Community:** enhance access to opportunities
- **Getting Around:** increase transportation choices and connections

Please participate in the planning process by visiting the project website WVCstationplans.com to complete the survey and interactive map by **September 16, 2024**.

Your input will be used by West Valley City to identify issues, needs, and opportunities within these three station areas.

Scan the QR code to complete the survey and interactive map

West Valley City is required by the State of Utah to have a Station Area Plan surrounding each light rail station in a one-half mile radius area within the city limits. The station area plans will be completed in compliance with Utah State Code
